SKILLS

Technical Languages

- HTML / CSS
- Java
- JavaScript
- Python

Softwares

- Figma
- Blender
- Maya
- Unity
- VSC

Personal Skills

- Attention to detail and creative
- Good collaboration and communication skills
- Good at problem solving
- Fast learner
- User-focused thinking

PROJECTS

Luminous Etching Website (Group Project)

July - August 2025

- Built a responsive e-commerce style website with HTML, CSS, and JavaScript for desktop and phone
- Created reusable UI (nav bar, footer, card) to keep the style consistent
- Designed wireframes and page layout to organize content and improve readability.
- Improved user experience by working on layout and navigation hierarchy based on peer testing
- Quickly learned and adapted JavaScript to build shopping interaction, and to display product card details using unique item IDs for 5+ products

DormMate (Group Project)

November - December 2025

- Designed interactive mobile prototype in Figma
- Implemented end-to-end navigation flows using React Navigation and Hooks
- Integrated feedback from user reviews to refine layout, hierarchy, and interaction patterns for a better user experience
- Planned the team workflow by defining tasks, timelines, and priorities.
- Reviewed code, and polished UI and improved app flow for final submission

YumMeal (Group Project)

January - April 2026

- Built a full-stack website for browsing, saving, and reviewing recipes, planning weekly meals, and managing a personal recipe collection, with a separate role-gated admin dashboard for content and user moderation
- Designed RESTful Express APIs and Mongoose schemas across five+ domains (users, recipes, favourites, reviews, meal plans), with JWT-based auth and bcrypt password hashing enforcing user vs. admin access on both client and server
- Integrated the Spoonacular third-party API to source recipe and nutrition data, building backend routes to fetch and normalize external data for the frontend
- Implemented React frontend with React Router-based protected/admin routes, and reusable components for recipe cards, a meal-plan calendar/scheduler, a star-rating review system, and toast notifications

EDUCATION

Simon Fraser University

August 2023 - Present

- Bachelor of Science in Interactive Arts and Technology
